

this section shall apply to all ground-water withdrawals initiated on or after July 13, 1978.

**§ 803.44 Standards for surface water withdrawals.**

(a) *Requirement.* (1) With respect to projects coming into existence on or after the effective date of this section, any project sponsor proposing to withdraw either directly or a public water supplier proposing to withdraw indirectly (through another user) from a surface source in excess of an average of 100,000 gpd for any consecutive thirty-day period, proposing to increase a withdrawal to more than an average of 100,000 gpd for any consecutive thirty-day period or proposing to increase a withdrawal above that amount which was previously approved by the commission, shall obtain commission approval of the withdrawal. These withdrawals may be denied or may be limited by the commission to the amount (quantity and rate) of water that is needed to meet the reasonably foreseeable needs of the project sponsor and that can be withdrawn without causing adverse lowering of streamflow levels, rendering competing supplies unreliable, causing water quality degradation that may be injurious to any existing or potential water use, adversely affecting fish, wildlife or other living resources or their habitat, or having a substantial adverse impact on the low flow of perennial streams.

(2) With respect to projects withdrawing any quantity of water prior to the effective date of this section, any project sponsor proposing to increase the said withdrawal in excess of 100,000 gpd above that which such project was withdrawing prior to the said effective date, shall apply for approval pursuant to subpart B of this part.

(3) Any sponsor of a project subject to this section shall complete a surface water withdrawal application. After obtaining approval under this section, the sponsor shall comply with metering, monitoring, and conservation requirements as set forth in this section.

(b) *Withdrawal application.* Information required by the commission is specified in the commission's application for withdrawal from surface water sources.

(c) *Metering.* Project sponsors shall meter or use other suitable methods of measuring surface withdrawals approved under this section. The meters shall be accurate to within 5 percent of the actual flow.

(d) *Monitoring and reporting.* Monitoring and periodic reporting of surface water withdrawals approved under this section is required. The required information includes but is not limited to the following:

(1) Daily, weekly, or monthly records of withdrawals by source, as specified by the commission, and reported annually;

(2) Description of conservation activity; and

(3) Records of releases or flowby for instream protection reported annually.

(e) *Planning.* If projections indicate that a project's surface water supply will be constrained in the future by either the quantity or quality of available surface water, the commission may, in its discretion, require the submission of a water resource development plan prior to accepting any new withdrawal applications for the same or related projects.

(f) *Interference with existing withdrawals.* If review of the application or substantial data demonstrates that operation of a proposed surface water withdrawal will significantly affect or interfere with an existing ground-water or surface water withdrawal, the project may be denied or the project sponsor may be required to provide, at its expense, an alternate water supply or other mitigating measures.

(g) *Effective date.* This section shall be effective six months after the effective date set forth in § 803.1(e), except for projects previously reviewed and approved by the commission under the general authority of section 3.10 of the compact. Commission authority shall continue over such previously approved projects.

(h) *Hydroelectric projects.* Hydroelectric projects, except to the extent that such projects constitute a withdrawal, shall be exempt from the requirements of this section; provided, however, that nothing in this paragraph shall be construed as exempting hydroelectric projects from review and approval under any other category of

## Susquehanna River Basin Commission

## § 804.20

project requiring review and approval as set forth in §§ 803.4 and 803.5.

### PART 804—SPECIAL REGULATIONS AND STANDARDS

#### Subpart A—Water Withdrawal Registration

Sec.

804.1 Requirement.

804.2 Time limits.

804.3 Administrative agreements.

804.4 Effective date.

804.5 Definitions.

#### Subpart B—Water Conservation Requirements

804.20 Requirement.

804.21 Effective date.

804.22 Definitions.

AUTHORITY: Secs. 3.4(2) and (9), 3.8, 3.10 and 15.2, Pub. L. 91-575, 84 Stat. 1509 *et seq.*

SOURCE: 60 FR 31401, June 15, 1995, unless otherwise noted.

#### Subpart A—Water Withdrawal Registration

##### § 804.1 Requirement.

In addition to any other requirements of commission regulations, and subject to the consent of the affected signatory state to this requirement, all persons withdrawing or diverting in excess of an average of 10,000 gpd for any consecutive thirty-day period, from surface or ground-water sources, as defined in Part 803 of this chapter, shall register the amount of this withdrawal with the commission and provide such other information as requested on forms prescribed by the commission.

##### § 804.2 Time limits.

(a) Except for agricultural water use projects, all registration forms shall be submitted within one year after May 11, 1995, or within six months of their initiation, whichever is later; provided, however, that nothing in this section shall limit the responsibility of an applicant to apply for and obtain an approval as may be required under part 803 of this chapter. All registered withdrawals shall re-register with the commission within five years of their initial registration, and at five-year intervals thereafter, unless sooner discontinued.

(b) Sponsors of existing agricultural water use projects (i.e. projects coming into existence prior to March 31, 1997) withdrawing or diverting in excess of an average of 10,000 gpd for any consecutive 30-day period from a surface or ground-water source shall register their use no later than March 31, 1997. Thereafter, the sponsors of new projects proposing to withdraw or divert in excess of 10,000 gpd for any consecutive 30-day period from a surface or ground-water source shall be registered prior to project initiation.

##### § 804.3 Administrative agreements.

The commission may complete appropriate administrative agreements or informal arrangements to carry out this registration requirement through the offices of signatory agencies. Forms developed by the commission shall apprise registrants of any such agreements or arrangements and provide appropriate instructions to complete and submit the form. Permits issued by a signatory party agency shall be considered a registration with the commission if issued pursuant to an agreement of understanding with the commission specifically providing therefor.

##### § 804.4 Effective date.

This subpart shall be effective on May 11, 1995 and shall apply to all present and future withdrawals or diversions irrespective of when such withdrawals or diversions were initiated.

##### § 804.5 Definitions.

Terms used in this subpart shall be defined as set forth in § 803.3 of this chapter.

#### Subpart B—Water Conservation Requirements

##### § 804.20 Requirement.

Any project sponsor whose project is subject to commission approval under this part or part 803 of this chapter proposing to withdraw water either directly or indirectly (through another user) from surface or ground-water sources or both shall comply with the following requirements:
